

# DORMAN STAINLESS STEEL EXHAUST HARDWARE KITS

## SUPERIOR REPLACEMENT HARDWARE IN **TIME-SAVING KITS**

The factory-style hardware used to secure the exhaust manifold to the cylinder head on certain vehicles is prone to cracking and failure from extreme thermal cycles, corrosion, and damage from removal attempts. Our Dorman OE FIX™ exhaust hardware is precision-manufactured from 100% stainless steel for superior strength and resistance to heat and corrosion.

We prepackage our OE FIX™ hardware in vehicle-specific kits so you don't have to waste valuable shop time chasing individual nuts, bolts and studs. Every kit contains the exact amount, type and size of direct-replacement hardware required for a predictable installation and a repair that lasts.

See Our  
Full  
Coverage

**Perfect fit** – matches the fit and function of the factory hardware, while offering superior durability

**Time-saver** – vehicle-specific kits include the exact amount, type and size of hardware components needed for a complete, seamless repair
