## CLEANING AND MAINTENANCE

- DO NOT apply any polishing or protective products to the roof tarp and panels, or use harsh abrasives, bleach or cleansers. The roof tarp and panels can be easily cleaned with mild soap and water. Handle mildew and mould stains with mild soap.
- Periodically check the anchors, the tension of rope and all hardware to ensure the stability of the canopy during use. Be sure that the cover kept tight.

### Dismantling and storage

- Dismantle the canopy in reverse order of the setup.
- Always dismantle the canopy completely! A partially dismantled canopy is not stable enough to withstand wind and weather and can be damaged or cause damage.
- Before storing, please make sure that the canopy is completely dry and clean. Fold the material carefully along the seams.
- Do not wrap the poles and anchors in the fabric, as they may damage it.
- Select a storage place that is dry and well ventilated to reduce the risk of mildew and mould stains. If pockets of water (large amounts of water on the roof), snow or ice should form, remove immediately or dismantle the canopy to prevent any damage.
- Store your canopy in a cool, dry location between seasons to prolong the service life of all components. Components are not equally durable and may require replacement over time at different intervals.
- Always keep these instructions together with the canopy!
