

■ **Antimicrobial**

Made with antimicrobial material which prevents the growth of harmful bacteria and protects against the build up germs between washing.

■ **Waterproof Design**

The Adesso AKB-618UB keypad has a waterproof design where water cannot penetrate due to a small silicon box inside which protects the PCBA from any moisture or liquids. Accidental spills aren't damaging to the circuitry inside so you can still enjoy the keypad for years to come!

■ **Ergonomic Design with arm wrist support**

The design of this keyboard with gently sloped shape encourages natural position of hands, wrists, and forearm in maximum comfort for long use.

■ **Quiet, Membrane Key Switches**

Membrane key switch technology is a top of the line design when it comes to keyboards. With the smooth quiet action of the membrane keys, you can input faster than you ever imagined smoothly and quietly with minimal clicking and noise. In addition, the key switches are rated at 5 million keystrokes with a 45-50 g actuation force.
