CAM LOCK SYSTEM OPERATION

HOW THE KNOCK DOWN (KD) ASSEMBLY SYSTEM WORKS

1. Screw the cam bolt into the pre-drilled threaded holes on the panel. Connect both panels together making sure cam bolt goes into the pre-drilled large hole on the end of panel that will accommodate the cam lock.
2. Insert the cam lock into the pre-drilled large hole on the panel. Make sure the arrow on the face of cam lock faces out and points towards cam bolt.
3. Take a cross-head screwdriver and rotate the cam lock clockwise to lock the cam bolt in place.

SPECIAL NOTE

Please read the instruction sheets completely before assembly. Examine all packaging material before discarding carton. Remove all parts from carton and separate into groups as indicated on parts list. Please ensure all parts are included prior to assembly. Use of power tools to complete assembly is not recommended.
